

LEADERSHIP IN ENERGY AND ENVIRONMENTAL DESIGN (LEED)

To Whom It May Concern:

The U.S. Green Building Council has developed the LEED program rating system to define and measure "green buildings".

One component of the LEED rating system is Recycled Content of Materials and Resources. Coated Solutions uses steel with a 20-40% content of recycled material in their production process.

ISO 14001

Coated Solutions is committed to protecting the local and global environment, for this reason we actively pursue environmental stewardship throughout our organization. Our policy includes environmental protection, compliance with regulations, minimize energy consumption and wastes, and considers the expectations of interested parties. Our prepainted steel facilities located in Aranda de Duero and Santander are certified to ISO 14001.

A handwritten signature in blue ink, appearing to be 'Alejandro García'.

Fdo.

Alejandro García
